SUBMERSIBLE WELL PUMPS

RANGE
3" – 12"

MAX PRESSURE
600 mWc (60 bar)

MAX CAPACITY
220 m³/h

EuroPump manufactureres Danish premium quality. We serve the Domestic market & export to four continents around the Globe.

EuroPump producerer 1. klasses dansk kvalitet. Udover Danmark, eksporterer vi til fire kontinenter verden over.

EUROPUMP SP-series are a professional range of submersible well pumps in full stainless steel AISI304 or AISI316. It is used World Wide by many accredited companies within water supply, groundwater control, wellpoints and drilling applications.

Our submersible motors are waterfilled and first class quality only. They are attached by NEMA flange standards to the pump and can easily retrofit other pumphead brands.

DYKKEDE BORERØRSPUMPER

EUROPUMP SP-serien er dykkede borerørspumper til professionelt brug komplet i rustfrit stål AISI304 eller AISI316. Referencerne tæller store respekterede virksomheder indenfor vandforsyning, grundvands-sænkning og boringer.

Vore dykkede motorer er vandkølede og i første klasses kvalitet. De er forsynet med en NEMA standard flange, som gør hurtigt udskiftning mulig, også til andre fabrikater.

VERTICAL MULTISTAGE PUMPS

MAX PRESSURE
500 mWc (50 bar)

MAX CAPACITY
210 m³/h

EUROPUMP SB-series are professional multistage pumps for industrial applications. Depending of the media, the pumps comes in three different material combinations; pump volute and flanges in cast iron and impellers in AISI304 (type SB), complete pump and connections (flange or Victaulic) in stainless steel AISI304 (type SBI) and the fully stainless steel version in AISI316 (type SBN).

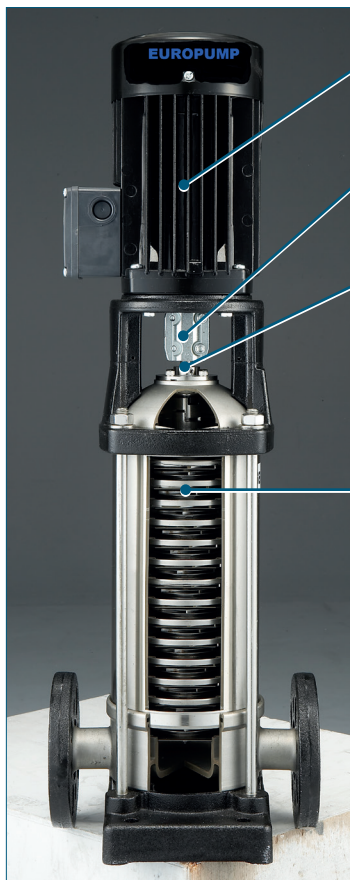

All material combinations can be equipped with an integrated variable speed drive and pump control to the motor (type SB(I/N)E).

VERTIKALE FLERTRINSPUMPER

EUROPUMP SB-serien er professionelle flertrinsspumper for industriel anvendelse. Afhængig af mediet, leveres pumperne i tre forskellige materiale kombinationer; pumpebund og flanger i støbejern og pumpehjul i rustfrit stål i AISI304 (type SB), komplet pumpe (flange eller Victaulic) i rustfrit stål AISI304 (type SBI) og komplet i syrefast rustfrit stål AISI316 (type SBN)

Alle materiale kombinationer kan som tilbehør leveres med en integreret frekvensomformer og pumpestyring til motoren (type SB(I/N)E).

IEC STANDARD MOTORS

IEC standard motors make replacement easy and cost effective
IEC standard motorer gør evt. udskiftning nemt og billigt

Shaft seal replacement without removing motor or pump by a special 2-part coupling
Udskiftning af akseltætning uden demontage af motor eller pumpe vha. split kobling

Mechanical seal in cartridge
Akseltætning i patron enhed

Integrated variable speed drive, dry running protection and pumpcontroller in one unit (optional)
Integreret frekvensomformer, tørløbssikring og pumpestyring i een (tilbehør)

Full welded impellers and volute casing, no spot weldings
Fuldsvejste pumpehjul og pumpehuse, ingen punktsvejsninger

Full welded impellers and volute casing, no spot weldings
Fuldsvejste pumpehjul og pumpehuse, ingen punktsvejsninger

SHAFT SEAL

INTEGRATED
VARIABLE
SPEED DRIVE

Europump manufactures a wide series of vertical immersible pumps widely used in the cooling industry and aquaculture.

HALVT NEDDYKKEDE PUMPER

Europump producerer en bred serie af halvt neddykkede vertikale pumper, som anvendes inden for blandt andet industrien og fiskeopdræt.

IMMERSIBLE PUMPS

SBK & CBK SERIES

MAX PRESSURE 22,0 bar
MAX CAPACITY 35 m³/h

HORIZONTAL MULTISTAGE PUMPS

CB SERIES

MAX PRESSURE 7,5 bar
MAX CAPACITY 16 m³/h

HB SERIES

MAX PRESSURE 7,0 bar
MAX CAPACITY 15 m³/h

Europump offers a wide range of state of the art Horizontal multistage pumps, complete in stainless steel AISI304 or AISI316. They are often used by original equipment manufacturers, in smaller booster systems or where compact design and high efficiency is needed.

HORISONTALE FLERTRINSPUMPER

Europump har et bredt program af moderne horisontale flertrinsspumper, komplet i rustfrit stål AISI304 eller AISI316. De anvendes ofte som pumpe komponent indbygget i maskiner, mindre trykforøger anlæg eller hvor kompakt design kombineret med høj virkningsgrad er nødvendig.
